

Danfoss® ERC 102

Your **STAYCOLD** unit comes complete with a Danfoss® Electronic Refrigeration Controller (ERC). This module has the following features:

Temperature Control

Control the set-point temperature of the cooler to within 0.1°C

- * Adjusted by pressing either the up or down arrow on the controller

ECO Mode

Provides energy saving benefits during off peak/closed times

- * Activated by pressing the **ECO** button on the controller or automatically if the door is not opened for 2 hours (adjustable)
- * Disengaged when door is opened or the button is pressed again
- * This function can be disengaged if the cabinets use requires - ask your **STAYCOLD** representative or dealer to advise how this can be done

Lighting Control

Simple control of the cabinet interior and exterior lighting

- * Turn the lighting of the cabinet on and off by pressing the light button on the controller

Voltage Protection Function

Protects the unit from harmful fluctuations in the power supply by isolating the compressor when the voltage fall outside of preset parameters.

Alarm Feature

Displays a visible alarm when unit is not operating correctly - seek technical assistance
